Applicants' election of Group 5 is acknowledged, as is the elected specie (oleyl thiophosphoryl-2-O-methyl glycerate). Pursuant thereto, claims 1-4, 6 and 8-57 are withdrawn from consideration. However, upon reconsideration, the restriction is revised, as set forth below.

✱

The previous definition of "G5" is repeated below:

**G5:** within this subgenus, all four of the following conditions are met: (a) the presence of a "potentiating component" is neither required or suggested, (b) the presence of a "pharmaceutically effective agent" is neither required or suggested, (c) the "components" referred to in claims 10-24 are neither required or suggested, and (d) the "pharmaceutically effective agents" of claims 29-34 are neither required or suggested.

Restriction to one of the following inventions is required under 35 U.S.C. §121 (the numbering begins with 13, to avoid conflict with prior numbering):

13. Claim 5, limited to compounds in which "M" is a phosphorous atom, and wherein the compositions are further limited to G5.

14. Claim 5, limited to compounds in which "M" is a sulfur atom, and wherein the compositions are further limited to G5.

✱

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

. . . .

In the event that Group 14 is chosen for initial examination, applicants will be required under 35 U.S.C. §121 to elect a disclosed specie (a specific compound) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. However, if Group 13 is elected, the previous species election will remain in force.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are witten in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
